PROFESSIONAL SUMMARY

Motivated Excel and data support professional who learns by building. Backed by 110+ hours of completed training in Microsoft Excel, data analysis, data entry, and Python fundamentals, with hands-on practice using PivotTables, lookup functions, SUMIFS, data validation, conditional formatting, charts, and formula-driven dashboards. Seeking remote Excel support, data entry, spreadsheet assistant, or junior data analyst support roles where accuracy, organization, and continuous learning are valued.

TECHNICAL SKILLS

Microsoft Excel: PivotTables, VLOOKUP/HLOOKUP, SUMIFS, IF/OR logic, Goal Seek, data validation, conditional formatting, charts, formula auditing, VBA/macros exposure

Data & Reporting: data entry, data cleaning, dashboard building, spreadsheet organization, data quality checks, basic reporting

Learning in Progress: Power BI Desktop, Power Query, SQL fundamentals

Tools & Platforms: Microsoft 365, Excel, Word, Outlook, OneDrive, GitHub, Git basics, Canva, Hostinger, NotebookLM, Visual Studio Code

AI-Assisted Workflows: ChatGPT and Claude for research, problem-solving, documentation, and project planning

PROJECTS

Project Management Board - Automated Excel Dashboard | Personal Project, 2026

- Built a multi-tab Excel project tracker with a live dashboard that updates task counts, completion rates, and priority breakdowns using COUNTIF, COUNTIFS, and COUNTA formulas.
- Created dynamic deadline tracking with nested IF and TODAY() logic to calculate days remaining and flag completed tasks.
- Used data-validation dropdowns, conditional formatting, and cross-sheet references to keep task data organized, consistent, and easier to review.
- Designed a simple user guide and structured workbook tabs for tasks, timeline, team tracking, and dashboard review.

Scramblio - Multi-Tool Web App | Founder & Developer, 2025-Present

- Designed, built, and maintain a live web application offering tools including a word unscrambler, budget calculator, word counter, and related utilities.
- Manage the project independently, including development, hosting through Hostinger, deployment, content updates, and basic SEO/analytics improvements.
- Apply self-directed learning, troubleshooting, and documentation habits to improve the app and expand technical skills.
